

# LEARN MORE ABOUT DAMON BRACES.

Tie-less braces that don't need to be "tightened" and are gentle to the teeth and tissues.

High-technology, memory-shape wires that quickly move teeth and require fewer adjustments.

A clinically proven treatment approach that aligns teeth and enhances facial aesthetics - usually without extractions or rapid palatal expanders.

## Fast treatment time and few office visits

With the Damon® System, treatment time is typically shorter than with traditional braces. Shorter treatment time means fewer appointments and a beautiful smile...faster. You may be surprised at how fast.

## Beautiful faces and beautiful smiles

The Damon® System employs a unique treatment philosophy that goes beyond straight teeth to create broad beautiful smiles. We take into account each patients' face, profile and other factors, anticipating what patients will look like in their 40's, 50's and beyond.

## Outstanding comfort

The days of having braces tightened are over. The Damon® System uses tie-less brackets that reduce the pressure on your teeth, allowing them to move more comfortably to their correct positions. This innovative approach to orthodontics ensures greater comfort throughout treatment.

## For people of all ages

Straight teeth and a beautiful smile can enhance self-esteem and self-confidence at any age, plus improve overall oral health. Ask your orthodontist how you can benefit from the Damon® System. It's never too late to look and feel great.

## Clinically proven advantages

- Extraordinary results for smiles and faces
- Fast treatment time and few office visits
- Outstanding comfort with no tightening
- No headgear or tooth extractions in most cases
- Easy to keep clean

### Damon® 3 Brackets

The Damon® 3 bracket offers several benefits for patients. It is made from stainless steel for stability and a clear material for aesthetics. The rounded structure improves patient comfort while maintaining overall performance.

The Damon® 3 System uses a self-ligation technique using lighter wires and lower friction brackets to move teeth, resulting in faster treatment times. Its slide mechanism, strong mechanical base, bonding and solid wall structure control tooth movement with speed and efficiency.

In addition to greater comfort, the Damon® System makes it easier to maintain good oral hygiene because the brackets are easier to keep clean. This contributes to greater overall health, happiness and physical attractiveness for the duration of treatment.

### Damon® 3MX Brackets

#### EXCEPTIONAL STRENGTH FOR EXTRAORDINARY PERFORMANCE

Experience the extraordinary strength and performance of the all-metal Damon® 3MX passive self-ligation bracket. Part of the clinically proven Damon System, the Damon® 3MX features a body of beautifully sculpted steel that elevates results and efficiency to an entirely new level.

- Passive self-ligation technology minimizes archwire friction, facilitating faster tooth movement
- Award-winning stainless steel metal-injection molding for exceptional strength and durability
- Easy-to-use slide mechanism with deep funnel and backstop for quick wire changes
- Four solid walls for fast, low-friction tooth movement and control
- Smooth slot corners for reduced binding even in severe deflections
- Ultra-smooth contours and rounded edges for maximum patient comfort and improved hygiene
- Rhomboid-shaped bracket and pad with vertical scribe line for fast and accurate placement
- Contoured base design for strong, reliable bond retention
- Convenient vertical slot for removable drop-in hooks and other auxiliaries to improve treatment flexibility and ensure patient comfort

### Damon® Q Braces

In an effort to provide our patients with the very latest in orthodontics, we are proud to offer new Damon® Q braces: the all-new, all-metal, self-ligating braces system that goes above and beyond to increase patient comfort and reduce overall treatment time while straightening your teeth.

Damon® Q represents the latest advances to the revolutionary Damon® self-ligating braces system, featuring brackets made entirely of high-grade stainless steel, making them strong and extremely durable. The brackets also have smoother, more rounded corners to help provide greater comfort for the patient and to appear even less noticeable than normal Damon® braces! Damon® Q braces feature removable positioning gauges to help ensure your orthodontist places the brackets in the perfect position to give you a great-looking smile! If you want a beautiful smile with the least amount of treatment time, please contact us for more information on the latest revolution in self-ligating braces: Damon® Q!

### Damon® Clear Brackets - MORE THAN MEETS THE EYE

Introducing Damon® Clear – the passive self-ligating bracket whose beauty is more than skin deep. Damon® Clear combines the look and comfort image-conscious patients demand with the strength and functionality discriminating clinicians need. Validated by multi-site in vivo studies and third-party university research, Damon® Clear is more than meets the eye.

- Completely aesthetic passive self-ligation bracket with unparalleled design
- Polycrystalline alumina (PCA) material is resistant to staining from coffee, mustard, red wine and other agents
- Eliminates the need for elastomerics, which stain and collect bacteria during treatment
- Advanced passive self-ligation technology with low ligation force, minimizing frictional resistance for more efficient tooth movement

# DAMON FAQs

**Q. Are all braces the same?**

A. With the Damon System, we don't just align the teeth; we create beautiful smiles. Your Damon orthodontist takes into account a number of factors when first diagnosing your smile. Each individual's face, profile and other factors are important in anticipating what they will look like in their 40s, 50s and beyond. The Damon System is designed to deliver results for a lifetime.

**Q. How long does treatment take?**

A. Treatment time with the Damon System is typically much faster than with conventional braces. Also, far fewer appointments are required during treatment.

**Q. Since the Damon System works so quickly, does that mean it is harsh or unsafe?**

A. No. In fact, what makes the Damon System work so quickly is that it uses far gentler, more biologically sensible forces than conventional braces. The low-friction nature of the system assures improved tooth position and improved facial harmony. Very light "shape memory" titanium wires are used to gently guide your teeth to their ideal position. Many people experience very little discomfort.

**Q. Will my teeth hurt after adjustments?**

A. Very light "shape memory" titanium wires are used that gently guide your teeth to their ideal position. Many people experience very little discomfort.

**Q. Aren't braces big and bulky?**

A. Not any more! Braces are much smaller than they were just a few years ago, and new materials are now used that make them very discreet.

**Q. What about adult treatment?**

A. No problem. Adults can be treated quickly and easily, too. Most importantly, they will receive a high-quality result.

**Q. How much does the Damon System treatment cost?**

A. We know that cost is a big question for anyone considering braces. The truth is, only your doctor can determine the cost for your specific treatment. It depends a lot on the kind of treatment you need, how long it will take, and even where you live. Damon Braces are usually similar to the cost of traditional braces. Most doctors offer flexible and affordable monthly payment plans, many with no down payment and no interest.

**Q. Does insurance cover Damon System treatment?**

A. Because medical benefits differ significantly from policy to policy, you should review your policy coverage. If you have orthodontic coverage, Damon System braces are covered to the same extent as regular braces.

**Q. What payment options are available?**

A. Most doctors will help you find options to make your treatment affordable. Many offices offer flexible and affordable monthly payment plans, many with no down payment and no interest. Many offices also offer third-party financing programs, specifically designed for healthcare expenses, that make it easier for you to get the treatment or procedures you want and need.
